### **DETAILED ACTION**

This Office action is in response to the communication filed March 19, 2002, Paper No. 19.

Claims 41-52, 78-83 are pending in the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Any objections or rejections not repeated in this Office action are hereby withdrawn.

### ***Response to Arguments and Amendments***

#### **Withdrawn Rejections**

Rejection of claims 47-52 under 35 U.S.C. 112, first paragraph, is withdrawn in light of Applicants' amendments filed March 19, 2002, Paper No. 19.

#### **New Objections and Rejections**

#### ***Specification***

The amendment filed March 19, 2002 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Applicant does not point to specific support in

Art Unit: 1635

the specification for the specific limitations comprising the nucleotide sequences delineated in claim 41, lines 5-6 and claim 47, lines 6-7 (i.e. bases 1 to 1011 or 1321 to 5030 of SEQ ID NOS: 1 or 2). Applicant is invited to point to specific support in the instant specification for these limitations. Otherwise, applicant is required to cancel the new matter in the reply to this Office Action.

Claims 41-52, 78-83 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The new matter comprising the nucleotide sequences delineated in claim 41, lines 5-6 and claim 47, lines 6-7 (i.e. bases 1 to 1011 or 1321 to 5030 of SEQ ID NOS: 1 or 2), as objected to above, has not been adequately described in the instant disclosure. One of skill in the art would not know how to use that which has not been described in the specification as originally filed.
